

EBVs : How it works?

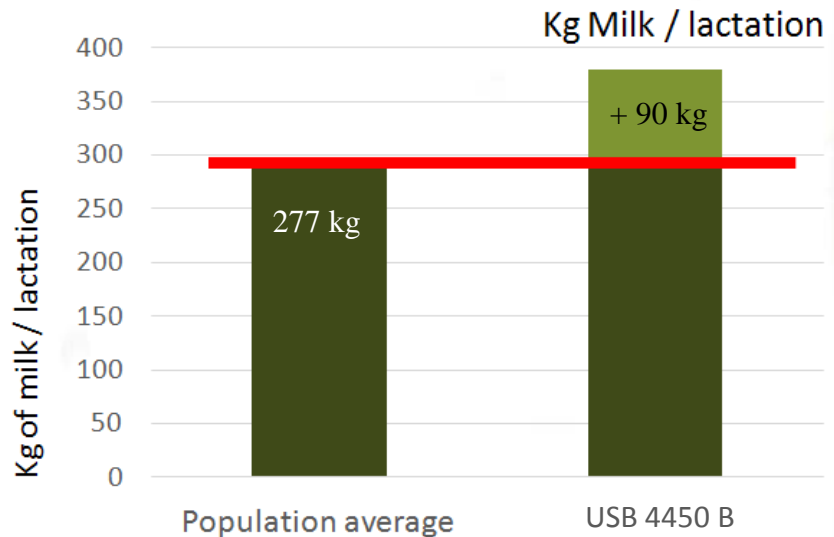

« Lolita » has an estimated breeding value to produce 90 kg more milk during a lactation than the dairy sheep population.

Lolita (USB 4450 B)

EBV milk = + 90 kg

VS

« Olga » has an estimated breeding value to produce 20 kg less milk during a lactation than the Dairy Sheep population.

Olga (USB 4230 B)

EBV milk = - 20 kg
