

Weighing Date Calculation Table

These are the authorized weighing periods for the 50d and 100d weighings.
Weights collected during these periods are included into the genetic evaluation module.

50d Weighing (weaning): Lamb should be 28 to 72 days old / Ideal: Lamb should be 35 to 65 days old

100d Weighing : Lambs should be 73 to 135 days old / Ideal: Lamb should be 85 to 115 days old

Note : A 28 days delay is required between the 50 day and the 100 day weighings.

Group #		Lambing Period		50 Day Weighing Period		50 Day Weighing Date	100 Day Weighing Period		100 Day Weighing Date
		From	To	From	To		From	To	
	Calendar Date								
	Julian Day								
	Day Determination	A	B	B + 28	A + 72		B + 73	A + 135	
	Calendar Date								
	Julian Day								
	Day Determination	A	B	B + 28	A + 72		B + 73	A + 135	
	Calendar Date
